

XM Satellite Radio has really made a difference for me in my commute to work. Please reject the NAB's petition 04-160 and oppose HR4026. Let XM continue to provide those individuals that spend 2 hours a day driving to and from work with news, weather, music etc make our drive more pleasant and most importantly alert. XM's programming keeps me awake and makes me a safer driver. Don't let NAB take away anything that works.

Thank you!

Susan
